Ace The Boards: Cytopathology is yet another marvelous addition to the series put together by our highly motivated and dedicated team of fellows and practicing cytopathologists at Ace My Path. This book resulted as a quest to provide trainees at various levels with well-illustrated concise, easy to read cytopathology

content.

The inception of this book began a year ago, when some of the authors preparing for their anatomic pathology or cytopathology boards were struggling to find a single, best reliable source for cytopathology. A team of highly motivated then-residents, fellows, and attendings across the US decided to gather in a virtual platform to explore the possibility of a cytopathology book that will be essential to residents, fellows and practicing pathologists. The rest is history, an exciting journey and we are delighted to bring the final result to you.

The first edition of this book is a comprehensive collection of globally adopted standardized classification systems, cytomorphology and high-yield facts of each entity in a bulleted format for an easy read, more than 650 high-definition pictures and brilliant illustrations- all bundled in one.

This book can be resourceful at various levels of training: whether as a medical student interested to know more about cytopathology, residents starting their first rotation in cytopathology, preparing for resident-in-service examination, or primary anatomic pathology, cytopathology fellow preparing for service work or cytopathology board examination, proficiency testing and as a day-to-day reference handy book by any surgical pathologist at all stages of their clinical career.

We thank all our editors, reviewers, and authors for their relentless hours of devotion and dedication for bringing this well-summarized, beautifully visualized, and easy-to-use resource that we believe will come handy to every pathologist and is a must-have for their bookshelf. We would also like to thank our image contributors for their amazing quality images.

We welcome valuable thoughts from our cherished readers as we embark on this journey, and we hope to incorporate their feedback in our future editions.

We wish you the greatest success as you study for the Boards and beyond!
