The first step involves sorting through all the items in the workplace and removing any unnecessary clutter. This helps in creating a clean and organized workspace, eliminating distractions, reducing wastage, and enhancing productivity.

Once unnecessary items have been removed, the next step is to arrange all essential items in a systematic manner. This includes labeling, proper storage, and making everything easily accessible to streamline workflows and minimize search time.

This step focuses on cleaning and maintaining a pristine workplace. Regular cleaning routines not only improve the physical appearance but also prevent equipment malfunction, improve safety, and instill a sense of respect and ownership among employees.
