Learn Spanish with the Sprintalk Method.

This book is entirely focused on the speed of learning. I go straight to the point so that you learn exactly what you really need to learn as soon as possible.

With the Sprintalk method I will expose you to thousands of phrases in context, so that your brain unconsciously establishes the patterns of language functioning and the meaning of things. In this sense, I have applied the approach of the theory of language acquisition, by the famous and renowned linguist Stephen Krashen. This system of learning is much more effective than studying vocabulary lists and grammatical explanations. This way most of the language is not learned but acquired unconsciously.

With this method, you will learn all the words and structures of the language always in context. This means that you will not find vocabulary lists. You won't study individual words presented out of their contexts. I do this because neuroscience and linguistics research prove that the brain learns quickly and permanently when the information acquired is contextualized.

In this book you will find:

- The 21 key lessons for having a fluent conversation in Spanish. It includes simple bilingual explanations, in English and Spanish, and over a thousand contextualized translation phrases for your brain to learn automatically by unconsciously establishing language behaviour patterns.

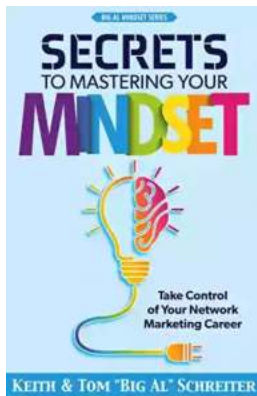

- 21 lists of reverse translation phrases ordered according to the content discussed in the lessons. In total there are 525 contextualized reverse translation phrases to enhance your ability to create language without blinking!

- 21 audio files with the 525 reverse translation phrases.

- 25 additional lists of contextualized phrases to crush the content of the lessons. There are more than 600 additional phrases that include the structures and vocabulary covered in the lessons to make you a real star of the Spanish language.

- 25 audio files with the additional lists pronounced in English and Spanish.

I really hope you learn a lot and enjoy this book.
